Hi Curtis,

Below is an earlier email I sent to Shelly. The program EPA set up for citizens to request drinking water testing is asking for a parcel ID number or similar identifier. I assume it is to assist in the tracking of the samples so that results can be associated back to a water source and not associated with an individual who could potentially have multiple land holdings.

Thanks,

**John Wieber**

**Subject:** Gold King Mine ER - EPA Data Request

Shelly,

It appears that the people handling the domestic drinking water testing program are needing to track parcel ID number in addition to other data for those participating in the well testing program. If I correctly understood our conversation yesterday, then the tribal lands don't really have a typical ownership parcel system but one of allotments, leases, etc... If there is a unique land identifier that the tribal lands use, then perhaps if it were added to the list of addresses you have within 1.5 miles of the river, it could prove useful to the well testing program. Please let me know if this list is something that can be shared.

Thanks,

**John Wieber**

Hi John,

I understand you are looking for some GIS data on Tribal Wells. Can you tell me exactly what data you are looking for and its purpose? Tribal member wells and their locations are considered sensitive data by the tribe. If I can understand your needs better, I can help you get that data.

Please call my cell, I am not in the office today.
